COMPANY PROFILE

Established in 2018, we specialize in the design, R&D, and manufacturing of smart door locks. Committed to integrity and ethics, we aim to build long-term partnerships with suppliers while delivering exceptional service and cutting-edge smart experiences to our customers.

I Core Competencies I

Through strategic alliances, we integrate expertise in:
Mold Development: Precision mold design, machining, and die casting.

I Advanced Manufacturing I

CNC machining, sheet metal stamping, automated welding, and painting/baking finishes.

I Smart Integration I

Tailored IoT solutions paired with lean assembly processes

I Quality Commitment I

Certified by SGS for ISO 9001 (Quality Management) and ETS for ISO 14001 (Environmental Management) & ISO 45001 (Occupational Safety), we uphold rigorous standards. Our in-house reliability lab ensures every product meets benchmarks for durability, security, and seamless functionality.

I Vision I

To redefine smart living by transforming entry points into intuitive experiences. From the moment users step inside, our locks seamlessly blend innovation, safety, and reliability—making the promise of a connected smart home an everyday reality.

I Customization I

We offer flexible, client-driven solutions to address diverse market needs, setting new benchmarks in the intelligent lock industry.
Main Target Oversea markets are Europe, North and South America and all Asia countries.

Deadbolt Lock

Upgrade your door security with the Super Smart Deadbolt Lock, a next-generation smart door lock designed for homes, apartments, offices, hotels, and rental properties. Featuring Matter compatibility, Tuya & TTLock App control, and advanced 3D face recognition, the DB-202-A1 redefines convenience and safety with cutting-edge technology.
